

Measuring Media Slant

Using Data of Daily Newspaper in Post-handover Hong Kong

XIA, Ying LI, Yujie

Sun Yat-sen University

Hong Kong University of Science and Technology

Why this topic?

- Media heavily shapes people's perception on certain institution, and further affects public opinion and even political ideology, especially in a society where information flows freely.

Research Questions

- **From media slant to media polarization?**
- Does media slant affect media reporting?
- What drives media polarization?

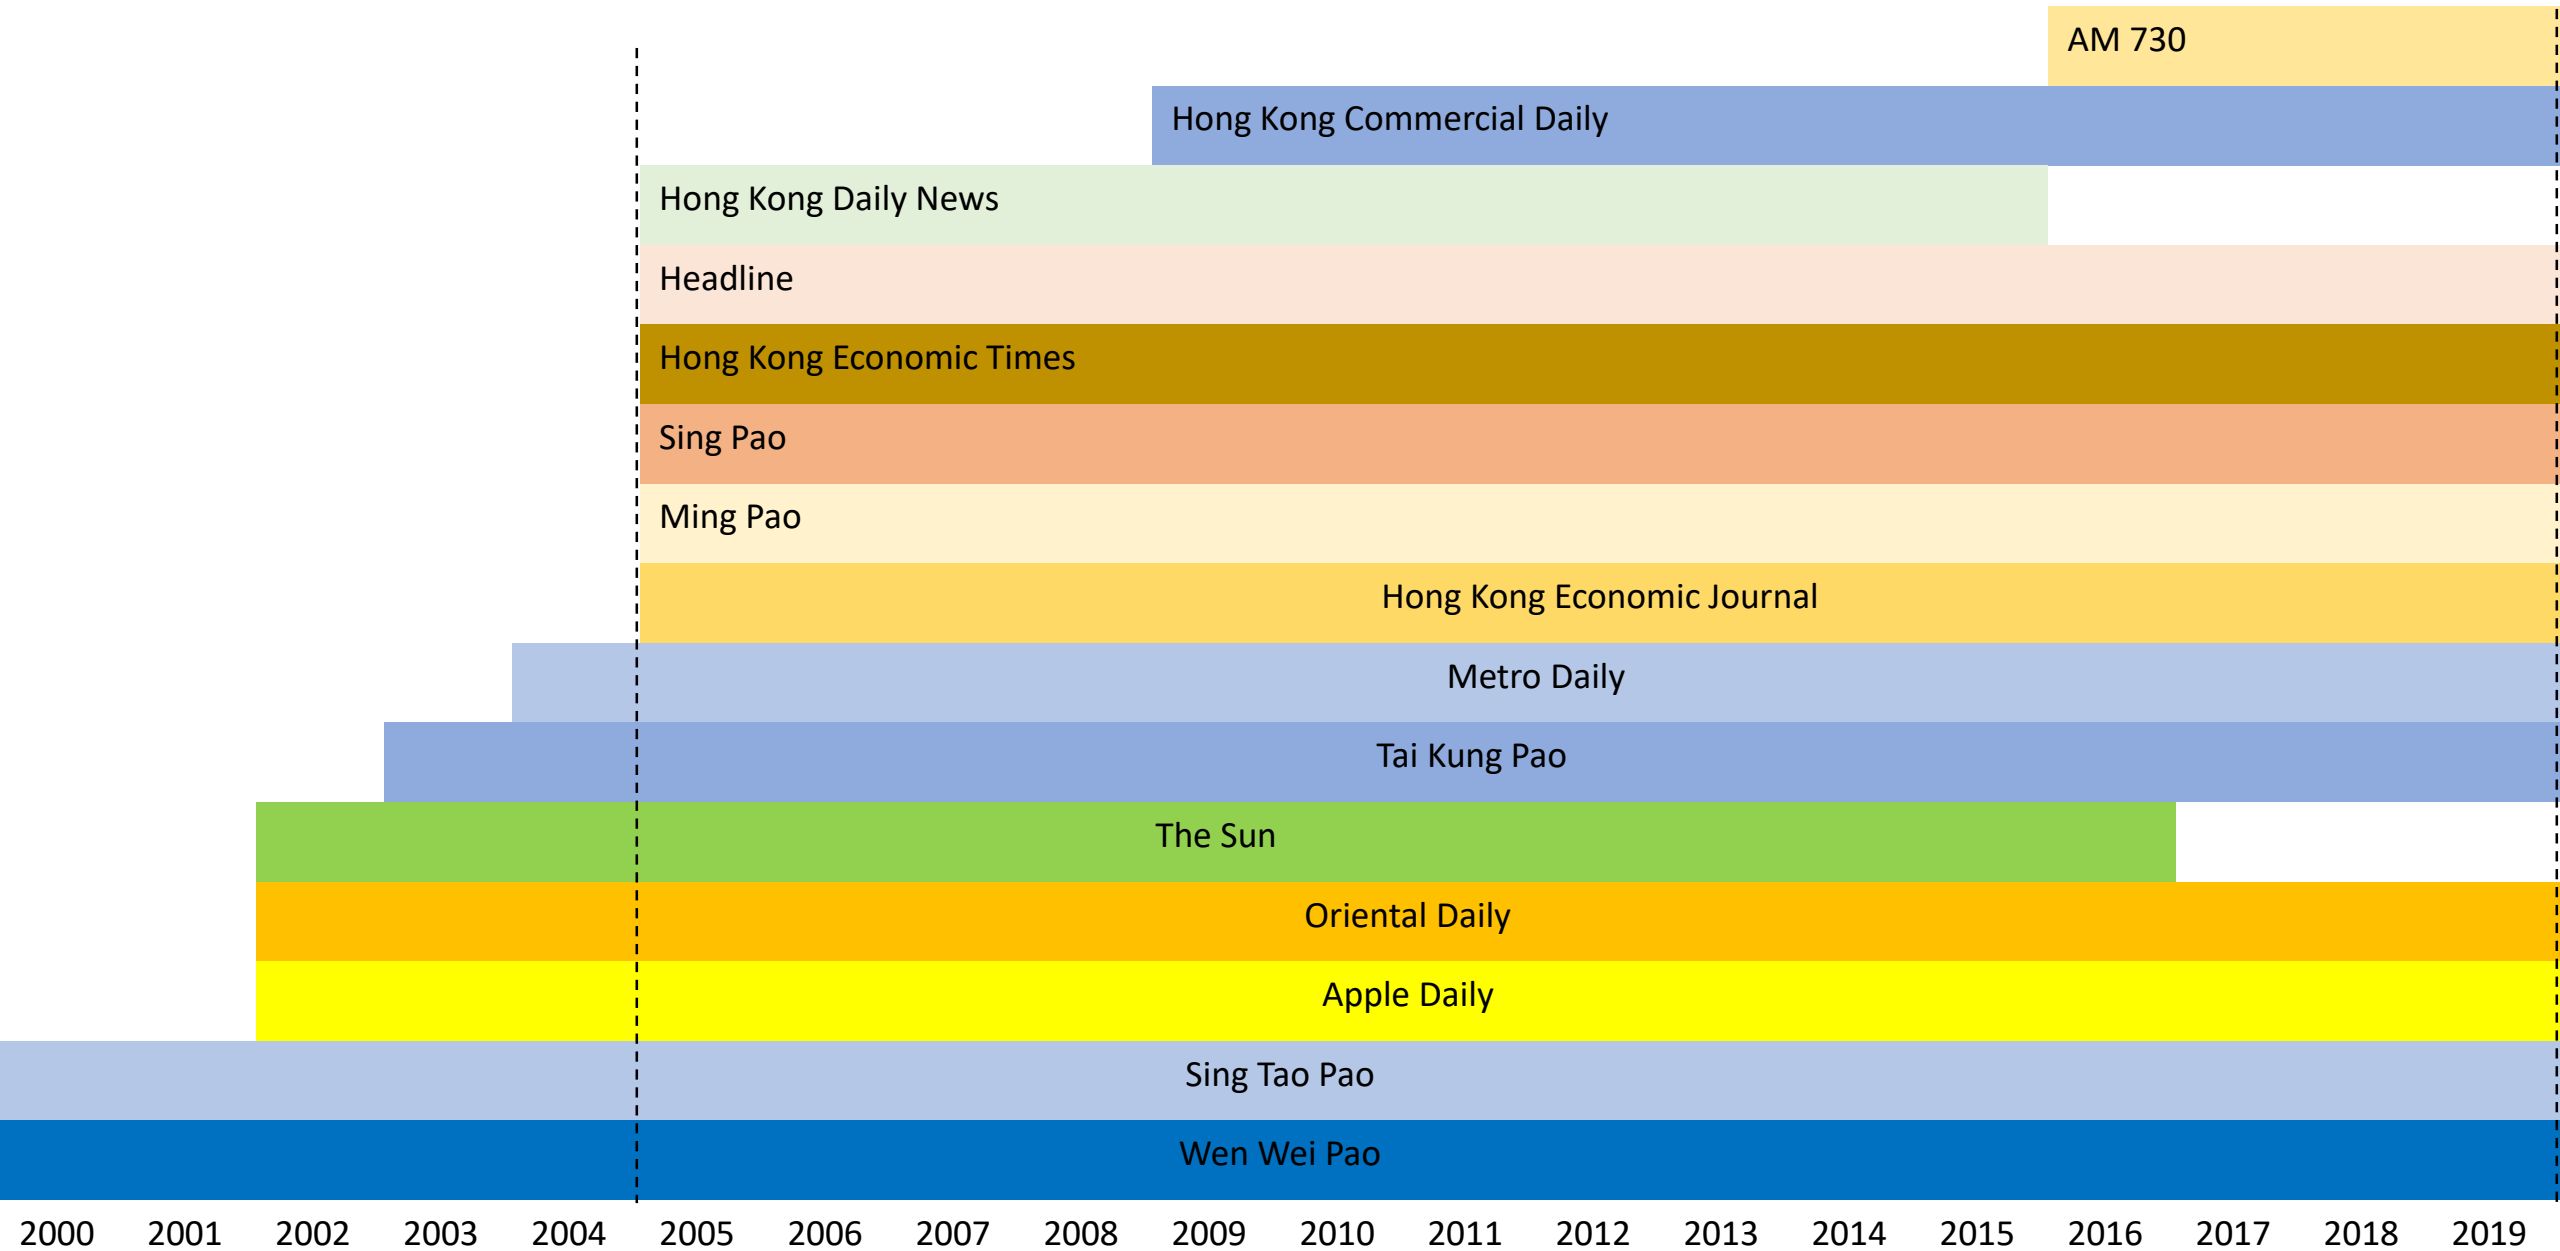

Literature Review: How to Measure Media Slant

- Machine learning based on manual definition
 - Very subjective, and sometimes arbitrary
- Gentzkow & Shapiro (2010): measure the similarity of a news outlet's language to that of a congressional Republican or Democrat.

Data

- Media reporting on CCP by Hong Kong newspapers in the post-handover era.
- **539381** unique articles, 15 newspapers, 2000-2019

Media Coverage

Media Coverage (number of articles)

Media Coverage (percentage)

Data preprocessing

- Removing extremely common words and stop words from the original text scripts

Cosine Similarity

- Using *Wen Wei Pao* and *Apple Daily* as the baselines, respectively measure cosine similarities of other newspapers with them, on a 7-day basis.

2002年各媒体报导偏好分布

2003年各媒体报导偏好分布

2007年各媒体报导偏好分布

2008年各媒体报导偏好分布

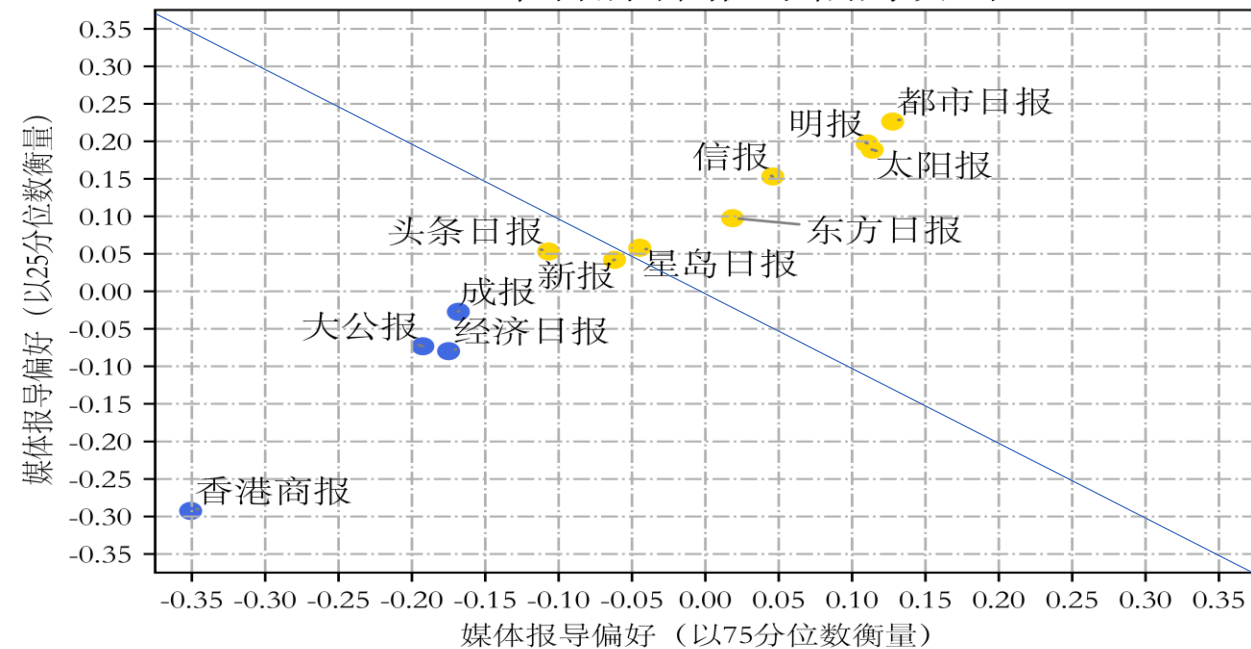

2008年各媒体报导偏好分布

2012年各媒体报导偏好分布

2014年各媒体报导偏好分布

2019年各媒体报导偏好分布

Further Studies

- Relationship between cosine similarity and reporting topics of relevant newspapers
- External events and media slant variation
- Relationship between media slant variation and other factors, e.g., Hongkongers' ethnic identity, political trust, government satisfaction etc.
